

New Hampshire Global Warming Campaign

Although our federal leaders made it a point to abstain from taking action on climate change, the New England Governors and Eastern Canadian Premiers should be commended for their re-commitment to take action on reducing global warming pollution at the 27th Annual Conference of New England Governors and Eastern Canadian Premiers. To be present and to witness the conviction of this international regional group to addressing climate change was an experience I will always remember.

The NEG/ECP leaders passed Resolution 27-7 Concerning Climate Change. Action will focus on increasing energy efficiency, conservation, and renewable energy, supporting cleaner transportation and further outreach.

By including a renewable source, The NH State Energy Plan will help achieve the goals outlined in the NEG/ECP Climate Change Action Plan.
